Executive Introduction

Statewide Transportation Improvement Program

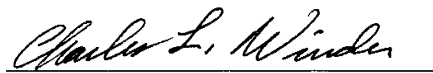

Idaho's Statewide Transportation Improvement Program (STIP) has been approved by the Federal Highway Administration and the Federal Transit Administration. This multi-year program identifies the transportation projects that have been selected through an inclusive and ongoing process. We appreciate the time taken by the elected officials, user groups, and concerned citizens to review and comment on this program.

The first half of this document contains project lists for the six districts and six metropolitan planning organizations (MPOs—the Boise, Nampa, Lewiston, Coeur d'Alene, Pocatello, and Idaho Falls areas), with corresponding color-coded maps. The second half of the document explains various modal transportation program elements, and also includes information on the following special programs: Federal-Aid Incentive, Federal Lands Highways, Highway Safety, Enhancement, Congestion Mitigation and Air Quality, Recreational Trails, and Scenic Byways.

The STIP establishes schedules for a variety of projects, including:

- highway, bridge, bicycle, and pedestrian facilities;
- highway safety;
- air quality;
- railroad crossing safety;
- airports;
- public transportation;
- transportation planning; and
- various grant programs.

Partnerships within the public and private sectors will continue to strengthen the department's planning efforts. We are encouraged by the statewide participation in the review of this program, and invite you to participate in the state's long-range transportation plan update process in 2003.

INDIAN RESERVATION ROADS

Projects funded under the Indian Reservation Roads Program are found within the district sections. In this document you will find projects for the Coeur d'Alene Tribe and Kootenai Tribe in District 1, the Shoshone-Paiute Tribes in District 3, and the Shoshone-Bannock Tribes in District 5. Project information came from the Bureau of Indian Affairs and was verified by the Tribal Transportation Planners.

Funding

Transportation Funding Overview

Federal-aid Funds

Federal funds administered by the Idaho Transportation Department are received from the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), the Federal Aviation Administration (FAA), and the National Highway Traffic Safety Administration (NHTSA). Federal-aid projects generally require state or local matching funds of approximately 7-20%. Additional information can be found at the Federal Highway Administration's web site www.fhwa.dot.gov/tea21/factsheets/index.htm.

FEDERAL HIGHWAY ADMINISTRATION FUNDS

Bridge State, Local, and Off-System funds are for the replacement or rehabilitation of bridges at least 20-feet long and have a qualifying "sufficiency rating," generally 50 or lower. The Idaho Transportation Board makes thirty-five percent of the Bridge funds available for use on non-State Highway System bridges.

Congestion Mitigation and Air Quality Improvement (CMAQ) funds are for transportation programs and projects that will contribute to the attainment of a National Ambient Air Quality Standard. The primary purpose of Idaho's CMAQ Program is to fund projects, planning, and programs in air quality non-attainment and maintenance areas, as well as areas of concern for ozone (O₃), carbon monoxide (CO), and particulate matter (PM) which reduce transportation-related emissions. Geographic areas of concern will be identified in cooperation with the Idaho Division of Environmental Quality (IDEQ) as having identified air quality problems or the potential for air quality problems.

Forest Highway funds are administered by the Western Federal Lands Highways Division. They are for improvements on any federal, state, or local roadway designated as a forest highway and serving a national forest.

Indian Reservation Roads funds are administered by the Bureau of Indian Affairs. They are for the maintenance, rehabilitation, or reconstruction of reservation roads and bridges.

Interstate Maintenance funds are for resurfacing, restoring, rehabilitating, or reconstructing the Interstate highway system. Adding capacity to the existing system may not be funded under this program except for high-occupancy vehicle lanes or auxiliary lanes such as truck-climbing lanes.

Metropolitan Planning funds are allocated to the state and distributed to metropolitan planning organizations for transportation planning.

National Highway System funds are for the reconstruction or rehabilitation of roadways on the congressionally designated National Highway System. This system includes the Interstates and most of Idaho's major U.S. and state highways.

Recreational Trails funds are administered by the Idaho Department of Parks and Recreation. They are for the development and maintenance of motorized and nonmotorized recreational trails.

State Planning and Research funds are allocated to the state and used to perform statewide transportation planning.

Surface Transportation Program (STP)—Enhancement funds are available to fund eligible enhancement activities under Idaho's three primary category of "enhancement" projects—(1) bicycle and pedestrian, (2) historic, and (3) scenic and environmental. Projects must be related to the surface transportation system.

Surface Transportation Program (STP)—Hazard Elimination / Rail funds are for safety projects to reduce accidents at identified hazardous locations and for bicycle and pedestrian safety improvements, including on-road facilities, public trails, and traffic calming activities, or for projects that improve motorist protection at railroad crossings. These funds are available for any state or local public road.

Surface Transportation Program (STP)—Local Rural funds are for projects in rural areas, and in cities with populations below 5,000. They are primarily used for reconstruction or rehabilitation of roadways functionally classified as rural major collectors or higher. These funds may also be used for planning, enhancement, transit, bridge, or safety activities. The Local Highway Technical Assistance Council (LHTAC) assists ITD in the administration of this federal program.

Surface Transportation Program (STP)—Local Urban funds are for projects in urban areas (5,000 population or greater). They are primarily used for reconstruction or rehabilitation of roadways functionally classified with FHWA as urban collectors or higher. These funds may also be used for planning, enhancement, transit, bridge, or safety activities. The Local Highway Technical Assistance Council (LHTAC) and Idaho's metropolitan planning organizations assist ITD in the administration of this federal program. Transportation Management Areas (200,000 population or greater) receive a specific allocation of funds that is drawn from Idaho's STP—Local Urban funds.

Surface Transportation Program (STP)—State funds primarily provide funding for reconstruction or rehabilitation of roadways on the State Highway System (Interstate, U.S., and State routes). These funds may also be used for planning, enhancement, transit, bridge, or safety activities.

Surface Transportation Research Program funds are used to support research, technology development, and technology transfer.

DISCRETIONARY FEDERAL-AID FUNDS — Awarded by the U.S Department of Transportation or Congress

Borders and Corridors funds are for planning, constructing, or operating projects in international border states and nationally recognized high-priority corridors.

Demonstration (ISTEA) or High Priority (TEA-21) funds are for U.S. Congress-designated projects. These funds cannot be used for any other purpose without congressional action.

Interstate Maintenance Discretionary funds are for resurfacing, restoring, rehabilitating and reconstructing (including adding lanes) on the Interstate highway system. Projects must be more than \$10 million and on a high-volume urban route or a rural route with high truck volume.

Public Lands Highways funds are available for any kind of transportation project eligible for assistance under Title 23, United States Code, that is within, adjacent to, or provides access to public lands. These highways may be under federal, state, or local jurisdiction.

Scenic Byways funds are for highways that have been designated as a national or state scenic, historic, or back-county byway.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION (NHTSA)

NHTSA highway safety grant funds are administered by the ITD Office of Highway Safety and the Idaho Traffic Safety Commission to fund statewide and local safety projects that address Idaho's eight most critical traffic-safety problems.

FEDERAL TRANSIT ADMINISTRATION FUNDS

Discretionary Capital Program (49 U.S.C. 5309) funds are allocated directly by Congress to state and local public agencies for eligible transit capital projects.

Elderly and Persons with Disabilities Program (49 U.S.C. 5310) funds are allocated to the state and distributed based on elderly and persons with disabilities in the state. Funds may be used only for capital purchases or to purchase services that directly benefit the elderly or persons with disabilities.

Intercity Bus Service (49 U.S.C. 5311(f)) funds are allocated to the state, to be used to provide fixed-route connections with a larger regional or national system of intercity bus service. Funds may be used for administration, operations, planning, and capital costs to provide links between rural areas and regional centers.

Job Access and Reverse Commute Program funds were authorized in TEA-21 (1998) to provide transportation in partnership with the welfare-to-work initiatives around the country.

Metropolitan Planning (49 U.S.C. 5303) funds are allocated to the state and distributed to the metropolitan planning organizations for transit planning. FTA funds are combined with FHWA funds in a Consolidated Planning Grant to develop multimodal transportation plans for the urbanized area.

Rural Area Formula Program (49 U.S.C. 5311) funds are allocated to the state and distributed to meet the needs identified in small cities (pop. under 50,000) and rural areas. Funds may be used for administration, operations, capital and planning costs associated with providing services to the general public.

Rural Transit Assistance Programs (49 U.S.C. 5311(b)(2)) funds are allocated to the state for transit research, technical assistance, training, and related support services to benefit Rural Transportation Providers. The state directly administers the program to provide training and technical support to those providers receiving Section 5311 funds.

State Planning and Research (49 U.S.C. 5313) funds are allocated to the state and used to perform statewide transit planning.

Statewide Administration (49 U.S.C. 5310 and 5311): The ITD Division of Public Transportation reserves funding to provide program administration and fulfill oversight responsibilities.

Urbanized Area Formula Program (49 U.S.C. 5307) funds are allocated by statutory formula directly to small urbanized areas (pop. of 50,000+; currently Coeur d'Alene, Nampa, Lewiston, Pocatello, and Idaho Falls). Funds may be used for operations, capital, and planning to provide public transportation services to the urbanized area. Funds available in the large urbanized areas (pop. of 200,000+; currently Boise) may not be used for operations.

FEDERAL AVIATION ADMINISTRATION and STATE AVIATION FUNDS

Airport projects are funded from a combination of federal, state, and local sources. Federal funds are basically available to Idaho airports in two categories, generally by airport function:

- (1) Primary service airports have regularly scheduled air service and enplane over 10,000 passengers annually (7 Idaho sites).
- (2) General aviation airports provide service for small aircraft (34 Idaho sites).

Federal Aviation Administration funds are passed directly to the recipient and do not pass through the Idaho Transportation Department. The state funded aeronautics grant program is administered by ITD's Division of Aeronautics and can be used to assist local governments with matching the federal funds (10% match required) or for airport improvements not eligible for federal assistance.

STATE FUNDS

STATE funded projects have no federal-aid participation and are primarily used to fund construction and maintenance on state highways.

Fiscal Constraint

The “Available Funding vs. Programmed Projects” tables that are found in this section compare the annual total project costs programmed in each category of funding to the anticipated annual available funding for each category. The methodology for estimating available funds for the Highways, Aeronautics, and Public Transportation programs follows.

updated 11-14-03 ***Highway Funding Assumptions***

The Highway Development Program’s table entitled “Available Funding with Match vs. Programmed Projects” that is found in this section shows the estimated FY 2003 – 2007 apportionments for Idaho. Because actual funding is not known until after the beginning of each fiscal year, funding assumptions are made to allow continued development of projects. Upon notification of the final FY 2003 apportionments the highway program is adjusted as necessary to maintain fiscal constraint. Following is a comprehensive list of assumptions used to develop the highway funding levels.

Federal-aid Funding Assumptions

Federal-aid apportionments are based on the following assumptions:

- Program structure is based on TEA-21 funding structure. TEA-21 is active through FY 2003. FY 2004 through 2007 assumptions are based on estimated apportionment levels in the last year (FY 2003) of TEA-21.
- Obligation Authority is equal to the estimated apportionments throughout the life of TEA-21.
- The FY 2003-2007 Program does not include any year-end redistribution of Obligation Authority not used by other states.
- The FY 2003-2007 Program does not include any Revenue Aligned Budget Authority (RABA) due to adjustments in the funding available to the states should the highway revenues exceed the “firewall” established under TEA-21.
- The “Available With Match” amounts includes the match and federal funds estimated to be available to program projects. These amounts are reduced 5% each year (FY 2004 and beyond) to allow for the estimated effects of inflation on project costs.

State Funding Assumptions

State Funded Program:

A base funding level of approximately \$34 million is estimated to be available for each fiscal year of the approved FY 2003 — 2006 State Highway Development Program. These estimates take into account projected state revenue, the reservation of funds for state match of federal aid, and other ITD needs.

Aeronautics Funding Assumptions

Both the federal and state programs are grant programs funded by user taxes. The approval or disapproval of each grant application determines funding. Available funding levels are estimated on appropriation and authorization levels. Federal-aid airport grants are from the Federal Aviation Administration direct to the airport owner (city, county, or state) and do not pass through the Idaho Transportation Department. State funds provide grants for improvements not eligible for federal assistance in addition to assisting with matching funds for federal-aid grants.

Public Transportation Funding Assumptions

The Public Transit Program is a grant program. Historical funding trends are used to estimate the funds available through FY 2004. If the Federal Transit Administration does not approve a grant, the project will not be funded, thus maintaining fiscal constraint.

The Transportation Equity Act for the 21st Century (TEA-21) is the basic law under which all federal transportation programs are funded. More specifically, Title III, the Federal Transit Act Amendments, is the authority for the funding of several public transportation programs. These programs are administered by the Federal Transit Administration (FTA) through the Idaho Transportation Department's Division of Public Transportation.

Idaho Transportation Department as in other programs. State grants can be used to assist with matching the federal grants and for improvements not eligible for federal assistance. Both federal and state programs are funded by user taxes. At the federal level, airline ticket tax, airfreight waybill tax, international passenger departure tax, and aviation fuel tax are income sources. The state airport program is funded by aircraft fuel tax and aircraft registration tax.

Project Selection

Project selection is a collaborative process involving the FAA, municipalities, and the ITD. Statewide systems planning and airport master planning coupled with public input are the basis of the Capital Improvement Program. ITD solicits project applications annually. The grant cycle is outlined below.

MONTH	ACTION ITEMS
OCTOBER	Letters to Sponsors (copies attached) Requesting: <ul style="list-style-type: none">- Grant Applications- Capital Improvement Programs (CIP)

Description of the Mode

The Idaho Transportation Department recognizes the value of bicycling and walking and offers opportunities for funding support. The majority of bicycle/pedestrian projects on the State Highway System are implemented in conjunction with designated highway improvement projects. Bicyclists and pedestrians are legitimate users of the state's transportation system and all transportation jurisdictions should consider and accommodate their needs.

Determination of Needs

Cities, counties, and metropolitan planning organizations must assess where needs exist for improved facilities and prioritize those needs at the community level. Any jurisdiction considering a major improvement to a roadway should always evaluate deficiencies in the access and accommodation of pedestrians and bicyclists. However, it must be recognized that simply providing a bicycle- and pedestrian-friendly environment cannot address all of the challenges associated with non-motorized transportation. Some safety problems, for example, may be more easily solved through programs than through facilities. A comprehensive assessment of bicyclist and pedestrian needs should result in more than one solution element—Engineering, Education, Enforcement, and Encouragement (the “4Es”) may all play an important role in a well-rounded approach. The *Idaho Bicycle and Transportation Plan* has an in-depth discussion on a comprehensive 4E approach.

Funding

All of the various funding programs described in the Modes section under “Highways” can be used to fund bicycle and pedestrian projects. The Office of Highway Safety's Bicycle and Pedestrian Grant Program funds activities aimed at safety education activities (but not facility construction or maintenance). The STP—Enhancement program recognizes bicycle and pedestrian projects as a

special funding category. These can be facility construction projects or projects that support safety education. More information on the STP—Enhancement program can be found on the ITD website: <http://www.state.id.us/itd/planning/reports>

Project Selection

Project selection is a collaborative process between state and local transportation officials and system users. The key to selection is for communities to determine a long-term sense of direction, which then becomes part of a local transportation system plan, usually a subcomponent of a comprehensive plan. Annually, the ITD solicits project proposals to be included in its *Statewide Transportation Improvement Program* (STIP), which is approved by the Idaho Transportation Board in September. Project selection is quite competitive and projects with demonstrated community support, adequate local planning, and documentation of public input have the best potential of being funded. Cities under 5,000 in population, counties, and highway districts can request assistance from the Local Highway Assistance Council (LHTAC) for developing project submittals. LHTAC administers the selection process for the Surface Transportation Program (STP)—Local Rural and STP—Local Urban programs. Proposed projects within the State Highway System’s right-of-way will be selected based upon input from the appropriate ITD district office.

Application Process

The schedule is concurrent with the schedule in the *Highway Program*, which is determined annually in late November. The department publishes a STIP Planning Calendar that shows the various project submittal deadlines for specific funding categories. LHTAC administers the application process for the STP—Local Rural and STP—Local Urban programs. Project proposals within the State Highway System’s right-of-way will need to be also closely coordinated with the appropriate ITD district office.

FAX: (208) 334-8025
damick@itd.state.id.us

Description of the Mode

From farm-to-market roads to Interstates, Idaho's highways, roads, and streets are vital to the state's economy. The state's agriculture, forestry, commerce, tourism, and recreation industries are dependent on good transportation facilities.

The Idaho Transportation Department is responsible for the State Highway System (all Interstates, U.S. Routes, and State Highways), which primarily serves city-to-city travelers. The balance of the roadway system primarily serves travel within cities and connections to our rural areas.

Determination of Needs

The determination of needs is a collaborative process in each district among the ITD, federal and local agencies, Indian Tribes, and the public. Roadway data, public input, agency input, and community / state planning documents are all considered as state and local projects are selected and prioritized. All participants review the requested projects annually during the *Statewide Transportation Improvement Program* (STIP) update process.

Funding

A variety of funding sources are available for highway development, which include:

- Bridge—State, Local, and Off-System
- Congestion Mitigation and Air Quality Improvement
- Demonstration or High-Priority
- Discretionary
 - Borders and Corridors
 - Interstate Maintenance
 - Public Lands
 - Scenic Byways

Forest Highway
Indian Reservation Roads
Interstate Maintenance
National Highway System
State Funds
Surface Transportation Program (STP)—Enhancement
STP—Hazard Elimination
STP—Local Urban
STP—Local Rural
STP—Rail Safety
STP—State

Funding source definitions can be found at the beginning of the “Funding” section.

The total cost of a roadway project includes preliminary engineering, right-of-way purchases, and construction. However, most of the preliminary engineering work and right-of-way purchase must realistically be pursued several years in advance of a project’s planned construction year. Project-level detail on preliminary engineering and right-of-way expenditures can be found in the *Highway Program*, which is available upon request. Project costs identified in the STIP include only costs associated with construction unless specifically noted otherwise.

Project Selection

Need-based project selection is a collaborative process between ITD headquarters, the ITD districts, the metropolitan planning organizations, local officials, other state and federal agencies, Indian Tribes, and the public. The Idaho Transportation Board reviews and approves the *Statewide Transportation Improvement Program* each September. The program includes five years of projects plus those in preliminary development (projects yet to be assigned a construction year). The first three years receive official approval from FHWA and FTA; the other years are included for planning purposes.

FAX: (208) 334-4424
jweaver@itd.state.id.us

Description of the Mode

Public transportation provides mobility alternatives for Idaho citizens and is a vital resource in sustaining economic development, enhancing the quality of life, relieving congestion, improving air quality, and reducing environmental and transportation concerns throughout the state. Public transportation services include:

- Fixed transit routes;
- Scheduled or unscheduled transit service provided by motor vehicle, bus, van, aerial tramway, and other modes of public conveyance;
- Paratransit service for the elderly and disabled;
- Shuttle commuter service between cities, counties, health-care facilities, employment centers, educational institutions, or park-and-ride lots;
- Subscription van or car pooling services; and
- Transportation services unique to social service programs.

ITD's Division of Public Transportation provides statewide general program coordination, planning, grant project monitoring, and process management. The division works with the Public Transportation Advisory Council, the Interagency Working Group, and the public to develop policies that will help meet the transportation needs of the citizens of Idaho.

Three metropolitan providers currently operate in urbanized (50,000+ population) areas designated by the U.S. Census with Section 5307 Urbanized Area funding:

- Boise Urban Stages (BUS) in Boise;
- Targhee Regional Public Transportation Authority in Idaho Falls; and
- Pocatello Regional Transit (PRT) in Pocatello.

Three new urbanized areas will begin receiving funds in FY2003—Lewiston, Coeur d'Alene, and Nampa. Providers have not yet been determined.

Nine city/rural transit systems serve populations less than 50,000:

- North Idaho Community Express (NICE) in Kootenai, Bonner and Shoshone Counties;
- Valley Vista Care Corporation as Benewah Area Transit;
- Regional Public Transportation (RPT) d.b.a. Valley Transit in Nez Perce and Latah Counties;
- Treasure Valley Transit (TVT) in Southwest Idaho;
- Trans IV Buses in Twin Fall and Jerome Counties;
- Valley Vista Care Corporation as MiniCassia Area Transit,
- CART in Teton, Lemhi, Jefferson, Madison and Bonneville Counties
- Ketchum/Sun Valley Transit Authority (KART); and
- PRT also provides transportation services to the rural areas of Southeast Idaho.

At least 85 organizations currently provide land-based transportation services in Idaho. Some of the providers (e.g., Greyhound and Northwest Trailways) provide service in multiple regions while others serve a limited area or population. Many senior-citizens organizations and disabled workshops operate vans or small buses for clients and the Idaho Department of Health and Welfare and the Idaho Division of Vocational Rehabilitation provide transportation services either directly or through reimbursements. A major goal of the division is to facilitate coordination and to help eliminate duplication of services

Public transportation in Idaho has improved significantly over the past few years. Service levels have increased and public transportation planning and administration have been strengthened. Over the next 5 years, improvement opportunities include strengthening policies, planning and programming governance, coordination, services, funding, and benefits.

Determination of Needs

In 1995, the Idaho Transportation Board approved and adopted *Movin' Idaho — Idaho Public Transportation Plan*. This qualitative plan was developed by a planning team consisting of Regional Public Transportation Advisory Committees (RPTAC) and the Public Transportation Advisory Council (PTAC) together with providers, staff, and consultants to create a proactive, long-term planning effort.

In 1996, the field research document *Idaho Statewide Public Transportation Needs and Benefits 1996 Telephone Study* was completed. The purpose of the telephone survey study was to measure public opinion on existing public transportation services and assess current and expected needs. The study also polled attitudes toward state and local funding for public transportation.

In 1997, the *Idaho Statewide Public Transportation Needs and Benefits Analysis Study* was completed. The study provides an overview of existing public transportation services. Through the use of mapping, data collection, and research, this document assessed levels of service in each

district and identified unmet needs that existed throughout the state. The results will help the Division of Public Transportation to:

- Increase public understanding of current and near-term public transportation needs;
- Provide a mechanism to help identify appropriate levels of service that will result in the highest value per dollar invested into public transportation; and
- Help identify funding issues.

The study is providing the Public Transportation Advisory Council (PTAC) and the division with valuable qualitative and quantitative facts that benefit analysis, planning, and decision-making into the 21st century.

Funding

Vehicle Investment Program -- The Idaho Transportation Board has approved a program using state funds to purchase capital equipment. The Idaho Legislature annually approves funding for the program that is dedicated to purchasing wheel-chair accessible vehicles in the rural areas of Idaho.

Federal funding is available to Idaho under Chapter 53, Title 49 of the United States Code (U.S.C.) and the Transportation Equity Act for the Twenty-First Century (TEA-21). The Federal Transit Administration (FTA) administers all funding programs available to the Division of Public Transportation. More details on these programs can be found in the Funding section.

Metropolitan Planning — 49 U.S.C. 5303: Funding is allocated to the state and distributed to the Metropolitan Planning Organizations (MPOs) by formula based on population. Currently there are three MPOs in Idaho — Ada Planning Association in Boise, Bonneville Metropolitan Planning Organization in Idaho Falls, and Bannock Planning Organization in Pocatello. Idaho utilizes a consolidated grant program which combines FTA grant funds with FHWA metropolitan planning organization planning funds. A 7.34 % local match is required through the end of the current authorization act.

Urbanized Area Formula Program — 49 U.S.C. 5307: Funding is allocated by statutory formula to the urbanized areas of the state. This program provides funding for areas with a population of 50,000 or more. Idaho has three urbanized areas as designated by the U.S.Census — Boise, Idaho Falls, and Pocatello. New designations are expected in the Spring of 2002. A 50% local match is required for operations, a 20% match for planning and capital expenditures, and a 10% match for capital expenses related directly to compliance with the Americans with Disabilities Act.

Nonurban Area Formula Program — 49 U.S.C. 5311: Funding is allocated to the state and is distributed to meet the needs identified in small cities (population under 50,000) and rural areas. A 50% local match is required for operations and a 20% match is required for administration and capital expenditures.

Intercity Bus Service — 49 U.S.C. 5311(f): Funding is allocated to the state and each state must use at least 15% of the Section 5311 funds to provide transportation to connect nonurbanized areas with national public transportation services. A 50% local match is required for operations and 20% match for administration and capital expenditures.

Rural Transit Assistance Programs (RTAP) — 49 U.S.C. 5311(h): Funding is allocated to the state for transit research, technical assistance, training, and related support services to assist Section 5311 Rural providers in Idaho meet their training needs. The division administers these funds directly and no match is required.

Elderly and Persons with Disabilities Program — 49 U.S.C. 5310: Funding is allocated to the state and is distributed based on elderly and disabled populations in the state. The funds may be used for purchase of service funds or capital acquisitions for private nonprofit organizations or public agencies that provide public transportation to the elderly and persons with disabilities. A 20% local match is required.

State Planning and Research — 49 U.S.C. 5313: Funding is allocated to the state and used to perform statewide transit planning. Activities include providing technical assistance to the MPOs, developing the statewide public transportation plan and strategic plan, and assisting the Public Transportation Advisory Council and the six Regional Public Transportation Advisory Committees with long-term planning. A 20% match is required.

Statewide Administration — 49 U.S.C. 5310 and 5311: Funding is reserved from the state allocations by the division to provide program administration and fulfill oversight responsibilities. The state may reserve up to 15% of the 5311 funds and 10% of the 5310 funds. The 5310 funds require a 20% match and there is no match requirement for the 5311 funds.

Congestion Mitigation and Air Quality (CMAQ): CMAQ funds are Federal Highway Administration funds allocated to the state that may be used to fund public transportation projects at the discretion of the Idaho Transportation Board. The funds are transferred to the Federal Transit Administration after the Board has approved the project. Transit projects include capital purchases, transit planning, and transit start-up. The local match is 7.34%.

Demonstration funds: Section 5309 “Discretionary” funding is generally allocated by Congress for specific capital projects. States and local public bodies are eligible applicants for these funds. The Division of Public Transportation has worked with the Idaho Transit Coalition to obtain Discretionary funding. Local match requirement ranges from 10% to 20% depending on the project.

Job Access and Reverse Commute Program: This new program was authorized in TEA-21 to provide transportation in partnership with the welfare to work initiatives around the country. Local match requirement is 50%. Contract income and funds from other Federal agencies may be used as match.

Flexible Funds: TEA-21 maintained the flexible funding provisions of the previous highway act that allows Surface Transportation Program (STP) funds to be used for both highway and transit projects. Eligible transit projects include vehicles, facilities and any other capital transit project eligible for assistance under 49 U.S.C. Chapter 53. Funds would be available with a local match range between 7.34 % and 20% depending on the program.

Project Selection

Project selection is based on the needs identified in the *Statewide Public Transportation Needs Assessment and Benefits Analysis Study*. The study included a series of strategies to maintain current service, enhance or expand existing services, or implement new services to meet the unmet need. Strategies were developed for each service (fixed route, demand response, rideshare (carpool and vanpool), intercity, and organized volunteer). The County Profiles identifying the needs in each county are updated each year.

Division staff reviews each grant application to make sure it meets all the application criteria and all federal requirements. The projects are evaluated to identify the organization that can best provide the services described. Staff develops a regional program of recommended projects for the 5310, 5311 and 5311(f) programs from the responsive applications.

Staff recommends a statewide program of projects to the PTAC. PTAC reviews the projects and provides input to the Idaho Transportation Board on the recommendation. The Transportation Board reviews the complete program of projects for all Federal Transit Administration programs and upon approval the process begins through which the funding is distributed.

Application Process

Applications for the Urbanized Area Formula Program Grants (5307) are prepared and submitted to Federal Transit Administration for the three urban areas in the state. The state has an oversight responsibility for these funds but the urban areas report directly to FTA. Urban monies become available to these providers as soon as the President signs a funding bill.

The division develops and submits a statewide application each September for all planning activities (5303 and 5313). Funds are available to the state and the MPOs as soon as the President signs a funding bill.

The division develops and submits an application each March for the Nonurbanized Area Formula Program (5311) and the Elderly and People with Disabilities Program (5310). Funds are made available to the providers on April 1st.

FY 2003 Application Time Line for 5310 and 5311 Grant Programs

June – September 2002	Open grant application period and public meetings.
October 2002	Review and evaluation of grant applications by division staff.
December 2002	Public Transportation Advisory Council reviews division staff recommendations.
February 2003	Idaho Transportation Board review and approval.
March 2003	Application submitted to FTA by division.
April 2003	State/Local agreements begin - Site visits with grantees to review agreements and reporting requirements.

Public Involvement

All applicants for the Nonurbanized Area Formula Program and the Elderly and Persons with Disabilities Program grant funds must notify the public and ensure they are a part of the process prior to submitting an application for funding to the division.

Applicants must publish legal notices indicating they intend to apply for federal funding and work with the division to provide the opportunity for a public hearing on the proposed project if someone with a significant economic, social or environmental interest in the project requests a hearing. Public Open Houses are held in each district during the application process to allow public questions and input about proposed projects.

The applicant must provide notification to private and other operators of public transportation services within the service area in order to avoid duplicating services. Notices must be written to give interested parties a fair and timely opportunity to comment.

The public may also provide comments about current Rural Public Transportation providers and projects that will likely receive continued funding during the draft STIP review process each July.

Phone: (208) 334-8210
FAX: (208) 334-4432
ronkerr@itd.state.id.us

Description of the Mode

The railroads in Idaho operate 1657 track miles in the state, including main lines, secondary main lines, branch lines, and short lines. The state is served by two major long-haul railroads, the Union Pacific Railroad and the Burlington Northern Santa Fe Railway, which provide connections to points in the United States, Canada, and Mexico. The state also has one regional railroad, as well as six short line railroads that act as feeders to the major railroads.

The railroads are an important part of Idaho's transportation system and economy. Railroads originated a total of 12.8 million tons of freight traffic in Idaho in 1999. Farm products were the top commodity originated, accounting for 3.6 million tons. Other top commodities originated by Idaho railroads in 1999 include nonmetallic minerals (3.3 million tons) and lumber or wood products (2.9 million tons). Idaho railroads also terminated a total of 10.4 million tons of freight in 1999, including 4.1 million tons of nonmetallic minerals (equal to 39 percent of Idaho's total), 2.4 million tons of farm products, and 1.2 million tons of chemicals.

The Idaho Transportation Department does not own or operate any active rail lines. The role of the state rail program has been to assist in the preservation of essential rail lines through state rail planning and administration of the federal Local Rail Freight Assistance (LRFA) Program (now discontinued), the Idaho Rail Preservation Program (not yet funded) or other eligible programs that may become available.

Determination of Needs

The economics of the rail system and alternative methods for retaining essential rail services are evaluated in the rail planning process. Priority is given to branch lines that could be abandoned or have service reductions because of poor track conditions. The rail planning process benefits shippers, railroads, communities and local officials who have a stake in preserving essential local rail freight service and jobs in the community.

Funding

The U.S. Department of Transportation's Federal Railroad Administration (FRA) has provided federal funding for the LRFA Program in the past for capital improvements, usually track rehabilitation. Identified projects which request financial assistance are reviewed and analyzed by the Idaho Transportation Department with regards to the needs identified in the rail planning process. Based on this evaluation, projects are selected for funding. However, Congress has not appropriated funds for the LRFA Program since fiscal year 1995. Congress authorized the Light Density Line Pilot Program in TEA-21, but no funds have been appropriated. The Idaho Rail Preservation Program (IC Section 49-29), a state rail program similar to LRFA, was enacted in 2001, but funds have not yet been provided. Other than funds to upgrade railroad crossings, there are currently no state or federal funds available to rehabilitate railroads.

Project Selection

The track rehabilitation program is designed to improve those rail lines that have suffered from deferred maintenance, and the infusion of funds could prevent the rail line from being abandoned. Potential projects must have a benefit/cost ratio greater than 1.0 and the line must carry a minimum volume of traffic. Projects are identified by the Idaho Transportation Department in coordination with local officials, shippers, the Idaho Railroad Advisory Council, and the involved railroads, with final approval made by the Idaho Transportation Board. Because of lack of funding, there are no rail rehabilitation projects listed in the FY 2003 Statewide Transportation Improvement Program.

Application Process

The application process assumes that funding for the LRFA Program or other similar federal or state program is authorized and appropriated by the time each federal fiscal year begins and also assumes potential projects have been analyzed and screened in the latest Idaho Rail Plan Update. If a railroad is interested, field inspections are undertaken to determine rehabilitation needs. Detailed rehabilitation plans and benefit/cost analyses are developed. If a project or projects qualify, an application is prepared and forwarded to the FRA.

If the FRA and the Idaho Transportation Board approve the projects(s), an agreement and technical specifications are negotiated with the railroad and implemented.

Congestion Mitigation and Air Quality Improvement Program

For more information contact:
Matthew E. “Matt” Moore, M.A.
Senior Transportation Planner
Phone: (208) 334-8296
FAX: (208) 334-4432
mmoore@itd.state.id.us

<http://www.state.id.us/itd/planning/reports/cmaq/cmaq.html>

PLEASE NOTE: A program solicitation for the FY 2006 will not occur during the customary 2002-2003 timeframe. A quality management review and audit of this program will take place instead. The program solicitation for FY 2006 is anticipated to occur November 1, 2003.

Description of the Program

The Idaho Transportation Department’s Congestion Mitigation and Air Quality Improvement Program (CMAQ) is a statewide competitive program that provides federal transportation funds to implement cost-effective activities, plans, and projects that are mutually beneficial to transportation and air quality. CMAQ projects should demonstrate the highest potential for preventing or relieving a community’s particular air quality problem. Planning activities can also be funded to develop a strategic plan that identifies additional projects and programs designed to reduce a community’s transportation-related air quality problems.

Determination of Needs

CMAQ funding is available throughout all areas of the state which have transportation-related air quality problems. Needs are determined by local governments, who work with the Idaho Transportation Department, the Idaho Department of Environmental Quality, and the Local Highway Technical Assistance Council to identify solutions to transportation-related air quality problems. CMAQ projects fall into two categories: construction and non-construction. The non-construction category is further broken out into transit-related projects and all others.

Construction projects may include: road surfacing and construction; bicycle and pedestrian route construction; and traffic flow improvements, Intelligent Transportation Systems, and intermodal facilities with construction components.

Non-construction projects may include: dust control and prevention; transit; conversion of public fleets to alternative fuels; traffic flow improvements and Intelligent Transportation Systems planning; special studies; and alternative transportation education, promotion, and outreach efforts.

Funding

The CMAQ program receives annual funding within the range of \$2,000,000 to \$4,000,000 in federal apportionment and obligation authority prior to matching requirements. The final amount funded each year depends on cost-effectiveness and air quality benefits of the submitted projects. Local match requirements have been reduced to 7.34 percent of the total project cost to increase funding availability.

CMAQ projects are funded through cost reimbursement. Project sponsors must have sufficient cash available to develop projects prior to their submittal for reimbursement. Previously incurred costs for a project are not eligible for reimbursement or as match. Projects must be proposed and implemented by sponsors that are local, state, tribal, or federal government agencies. A sponsoring agency must have responsibility and legal authority to provide required matching funds, complete the project, and provide maintenance upon completion.

Project Selection

CMAQ projects are evaluated and ranked using general air quality and specific project criteria. General criteria for determining whether an area qualifies to apply for CMAQ funding are specified in ITD Administrative Policy A-11-05. Air quality analysis for projects must address both qualitative and quantitative components. Additionally, Idaho Transportation Board Policy B-11-05 requires uniform statewide comparison of projects for cost-effectiveness. Cost-effectiveness is determined by applicants using an equation to compute cost compared to emissions reductions.

Preference in funding is given to CMAQ projects that:

- Are measures, plans, and programs which either are, or have been developed as part of the ***Plan for the Control of Air Pollution in the State of Idaho***;
- Are designed for areas that are nonattainment for any criteria air quality pollutant or have the potential to be an air quality problem area in the near future;
- Have been reviewed by and coordinated through the local IDEQ regional office, including endorsements, as may be appropriate; and
- Are projects from a comprehensive, transportation and/or capital improvement plan.

Projects are ranked by the CMAQ Technical Review Committee according to a matrix of factors, which are taken from Idaho Transportation Board Policy B-11-05, ITD Administrative Policy A-11-05, and the CMAQ Program Technical Analysis Protocol. This matrix is available as part of the program application package.

Application Process

A Letter of Interest Notice announcing the next application period is mailed out in early November to the following organizations in Idaho: Metropolitan Planning Organizations, Cities, Counties, Local Highway Jurisdictions, Public Transportation Providers, Tribes, the Local Highway Technical Assistance Council, and the Idaho Department of Environmental Quality. Application packages can be downloaded from the Internet at:

<http://www.state.id.us/itd/planning/reports/cmaq/cmaq.html>

Project application packages can also be obtained by submitting a written letter of interest by mail, facsimile, or electronic mail to the program contact identified above.

The application packet includes application forms, program guidance and policies, and a list of resource contacts for each region of the state of Idaho. ITD district offices conduct public outreach meetings in November and December to assist potential sponsors with the preparation of applications. Projects within metropolitan planning organization (MPO) areas must be submitted to the MPOs in February. Applications are then due into ITD district offices in March.

The CMAQ Technical Review Committee selects a recommended list of projects in April. This committee is made up of local, regional, state and federal transportation and air quality experts. This list of recommended projects is available for public comment as part of the next draft Statewide Transportation Improvement Program, released in late June. The Idaho Transportation Board takes final action on recommended projects at their September meeting. Following federal approval of the program, funds are available for approved projects once adequate obligational authority has been received.

Enhancement Program

For more information contact:

Patti Raino

Intermodal Planning Manager

Division of Transportation Planning

praino@itd.state.id.us

Phone: (208) 334-8209

FAX: (208) 334-4432

<http://www.state.id.us/itd/planning>

Description of the Program

The Enhancement Program was created by the Intermodal Surface Efficiency Act of 1991 (ISTEA) and continued in 1998 with the Transportation Equity Act for the 21st Century (TEA-21). The program funds activities that have not traditionally been included in the design and construction of the transportation system. The funds cannot be used for routine or customary elements of construction and maintenance, or for required mitigation. In Idaho the program's stated purpose is "to preserve and create more livable communities where roads blend with and preserve the natural, social, and cultural environment, by using flexible and innovative funding and design features of the enhancement funds." The TEA-21 breaks the program into twelve eligible activities. The Idaho Transportation Department (ITD) groups these twelve into three general categories: (1) pedestrian and bicycle enhancements, (2) scenic and environmental, and (3) historic enhancements.

Determination of Needs

Projects related to surface transportation will only be considered under the Enhancement Program. Enhancement funds are available only for special or additional activities not normally required on highway or transportation projects.

Funding

Ten percent of a state's Surface Transportation Program (STP) apportionment must be set-aside to fund activities that enhance the transportation system in ways that have not traditionally been included in the design and construction of the transportation system. For the remaining years of the Transportation Equity Act for the 21st Century (through FY 2003) this translates into approximately \$4.5 million per year in Idaho. Idaho Transportation Board policy has set a \$500,000 federal-aid cap on Enhancement projects. Enhancement projects are part of a federal-aid program that provides payments through reimbursement of qualified expenditures.

This means that a sponsor pays the cost associated with the project and submits a reimbursement request to ITD. Participation in the program requires matching funds from the agency sponsoring the project. The “match” ranges from 2% to 10% of the project total, depending on the project’s size. The match may be fulfilled through cash expenditures or approved “in-kind” contributions. Sponsoring agencies must budget for these costs in their annual budget process. The Idaho Transportation Board has recommended minimum and maximum program funding guidance for the three general categories, (1) 40-70% for pedestrian and bicycle enhancements, (2) 15-30% for scenic and environmental, and (3) 15-30% for historic enhancements.

Project Selection

This is a statewide competitive funding program. No jurisdiction is guaranteed Enhancement funding. A seven-member Enhancement Advisory Committee is responsible for reviewing and prioritizing all project submittals based on criteria outlined in the application packet. Projects that ranked high enough and pass favorably through a 30-day public comment period in July are then presented to the Idaho Transportation Board in September for final approval and inclusion into the Statewide Transportation Improvement Program. The ITD district offices oversee the implementation of these projects.

Application Process

Project solicitation is for projects to be built in the third year of the program to allow sufficient time for project development. Local public agencies, Indian tribal governments, ITD internal groups, and other state and federal agencies may apply for enhancement funding. The same sponsor may submit more than one project. Project sponsors within a metropolitan planning organization’s (MPO) jurisdiction must submit their projects to the MPO. The program’s application period generally opens in November and closes in early February. An application packet or notice of availability is sent to cities, counties, highway districts, tribes, select state agencies, and others who have expressed interest during past application periods. The application packet is available in hard copy or can be downloaded from the ITD web site. All new project submittals go through a 30-day public comment period in July. Sponsors are notified in October with project funding information.

Federal Lands Highways Program

For more information contact:
David R. Amick
Highway Programming Manager
Division of Highways
Phone: (208) 334-8264
FAX: (208) 334-3858
damick@itd.state.id.us

Description of the Program

The Federal Lands Highways Program (FLHP) provides funding for a coordinated program of public roads and transit facilities serving federal and Indian lands. Included in the funding subcategories are Park Road & Parkways, Indian Reservation Roads, Public Lands Highways (both discretionary and Forest Highway), and Refuge Roads. Federal agencies participating in this program are the Federal Lands Highway Divisions, Bureau of Land Management, the U.S. Forest Services, the U.S. Park Service, and the Bureau of Indian Affairs. The STIP provides project information on the Forest Highway, Public Lands Discretionary and the Indian Reservation Roads Programs.

Determination of Needs

Projects are developed based on needs and program requirements established by the various federal agencies. In the Forest Highway Program a tri-agency working group consisting of the Idaho Transportation Department, Forest Service and the Western Federal Lands Highway Division determine project need. Under the Indian Reservation Program funding is distributed to tribes based on an agreed-upon distribution formula and is used to maintain and reconstruct Indian reservation roads and bridges. None of these programs are administered by the Idaho Transportation Department.

Funding

Under the 1998 Transportation Equity Act for the 21st Century each of the federal programs receives an annual distribution of funds.

- Within Idaho, approximately \$13 million is allocated for forest highway road projects in the Forest Highway Program
- Nationally, approximately \$70-75 million is allocated to the Public Lands Discretionary Program annually either through congressional earmarks or through a national competitive process.
- Nationally, approximately \$275 million is distributed annually to Tribes through a formula allocation.
- Nationally, approximately \$165 million is distributed annually to Park Roads and Refuge Roads receives approximately \$20 million.

Project Selection

Forest Highway Program: The tri-agency working group nominates projects for placement in the Forest Highway Program. Project selection is based on factors such as use, importance, and condition. Roads must be designated as a forest highway serving the national forest. Designated roads can be local, state, or federal roads.

Public Lands Discretionary Program: Project selection is at the national level. Projects must be submitted through the state transportation agency and prioritized if more than one project is submitted. Generally the RFP comes out in April and proposed projects are due into the Idaho Transportation Department by the end of May for submittal to the Federal Highway Administration sometime in June. States such as Idaho, with extensive public lands, are provided some preference in the selection process. Check the website below for more information on this program.

Indian Reservation Road Program: Project selection is through the Bureau of Indian Affairs and the tribes based on the allocation formulas, project readiness, and need. Check the website below for more information on this program.

Highway Safety Program

For more information contact:

Jo Ann Moore

Highway Safety Manager

Division of Highways

Office of Highway Safety

jmoore@itd.state.id.us

Phone: (208) 334-8100

FAX: (208) 334-4430

<http://www2.state.id.us/itd/ohs>

Description of the Program

The Office of Highway Safety, (OHS), administers the federal Highway Safety Grant Program, which is funded by formula through the Transportation Equity Act for the 21st Century (TEA-21) of 1998, and the Highway Safety Act of 1966. The goal of the program is to reduce deaths and serious injuries resulting from motor-vehicle collisions by implementing programs designed to address driver behaviors. The purpose of the program is to provide grant funding at the state and community level for a highway safety program that addresses Idaho's own unique circumstances and particular highway safety needs.

Determination of Needs

A "traffic safety problem" is an identifiable subgroup of drivers, pedestrians, vehicles, or roadways that is statistically higher in collision experience than normal expectations. Problem identification involves the study of relationships between collisions and the population, licensed drivers, registered vehicles and vehicle miles, as well as characteristics of specific subgroups that may contribute to collisions.

In the fall of 1999, OHS staff and the Idaho Traffic Safety Commission (ITSC) jointly developed a three-year safety plan for FY 2001-2003. In accordance with federal requirements, one element of the plan was to discuss how traffic safety problems would be identified and addressed over the course of the three years. The process used to identify traffic safety problems began by evaluating Idaho's experience in each of the National Highway Traffic Safety Administration's, (NHTSA), eight highway safety priority areas. These program areas were determined by NHTSA to be the most effective in reducing motor-vehicle collisions, injuries and deaths. Consideration for other potential traffic safety problem areas came from problems noted by ITSC members, OHS staff, and by researching issues from other states.

Comparison data was developed, where possible, on costs of collisions, the number of collisions, and the number of deaths and injuries. Supplementary data was gathered from the Idaho State Collision database on helmet use for motorcycles and bicycles, child safety restraint use, seat belt use, and from available violation, license suspension, and arrest information.

Ultimately, Idaho's most critical driver behavior problems were identified. The areas were selected on the basis of the severity of the problem, economic costs, availability of grantee agencies to conduct successful programs, and other supportable conclusions drawn from the traffic safety problem identification process.

Funding

In October 1999, the Idaho Traffic Safety Commission voted to accept the FY 2001-2003 Idaho Focus Areas and approved the targeted funding ranges anticipated to be programmed over the three years. These were:

<u>Focus Area</u>	<u>Target Funding Range</u>
Safety-Restraint Use	20-35%
Impaired Drivers	15-25%
Risky Driver Behavior	15-30%
Youthful Drivers	5-25%
Roadway Safety/Traffic Records	8-20%
Bicycle and Pedestrian Safety	0-5 %
Emergency Medical Services	5-10%
Other	0-10%

Each October, the ITSC reviews the identified focus areas, goals, and funding ranges. Adjustments for the coming year, as warranted and supported by data analysis, are made at that time. Progress toward achieving goals is presented and reviewed by the ITSC each October.

Project Development

The annual project selection and development process begins by notifying state and local public agencies involved in traffic-related activities of the availability of grant funds. A Request for Proposal (RFP) is released each January. Grant applicants must complete and submit a Letter of Intent, in accordance with the information provided on the form, by the end of February.

Once the application period has closed, potential projects are first sorted according to the focus area that most closely fits the project. OHS develops priority and funding recommendations using evaluation criteria that assesses each project's potential to:

- Make a reduction in traffic collisions,
- Reduce the severity of traffic collision injuries,
- Improve the operation of an important traffic safety system,
- Fit in as part of an integrated communitywide collision-reduction project, and
- Increase the coordination of efforts between several traffic safety agencies.

Funding recommendations are incorporated into the draft Statewide Transportation Improvement Program (STIP) and presented to the ITSC each June. Final project adjustments are made after a 30-day public comment period is complete. The Idaho Transportation Board approves the Highway Safety Plan in August.

Local Federal-Aid Incentive Program

For more information contact:
Joseph K Haynes, PE
Local Highway Administrator
Local Highway Technical Assistance Council
Phone: (208) 344-0565
1-800-259-6841
Fax: (208) 344-0789
jhaynes@lhtac.org
www.lhtac.org

Description of the Program

The Local Federal-Aid Incentive Program is for Local Highway Jurisdictions (cities, counties, and highway districts) in Idaho. Each year Local Highway Jurisdictions submit project proposals to the Local Highway Technical Assistance Council (LHTAC). LHTAC scores each project; the projects are prioritized and submitted to the Idaho Transportation Board for approval. If the Board approves them, they are included in Statewide Transportation Improvement Program (STIP).

Funding

The Local Federal-Aid Incentive Program is funded from the Federal Highway Administration's Surface Transportation Program (STP). The Idaho Transportation Board suballocates \$10 million in two funds—STP-Urban and STP-Rural, ensuring that funding is available to both local rural and urban jurisdictions. The STP-Urban funds are designated for cities and urban areas with a population of 5,000 and over (population numbers are determined by an official U.S. census). By population a percentage of the STP-Urban funds are available to the metropolitan planning organizations, the remainder is available under the Local Federal-Aid Incentive Program. The STP-Rural funds are designated for counties, highway districts, and cities with a population under 5,000.

Project Selection

Local Highway Jurisdictions identify desired projects and submit them to LHTAC on an annual basis. In addition to the criteria applicable to any STP project (i.e. matching funds, road classification, etc.) projects are scored according to criteria that emphasize multi-jurisdictional transportation planning, transportation and land-use planning, capital improvement plans, and road management programs. Jurisdictions that have not developed a transportation plan can submit a transportation-planning project.

Application Process

Applications forms are sent to all Local Highway Jurisdictions in the fall of each year. The applications are due around the first of March. The applications are scored and prioritized and then approved by the LHTAC Council and submitted to the Idaho Transportation Board in May. The projects are included in the Statewide Transportation Improvement Program (STIP) public comment draft, which undergoes a 30-day comment period beginning the first week of July. In September, the Idaho Transportation Board approves the STIP for submittal to the Federal Highway Administration and Federal Transit Administration. The federal agencies have final approval over federally funded projects. Federal approval is usually received in November and then project development can begin.

www.idahoparks.org/about/grants.html

Description of the Program

The Recreational Trails Program of 1998 establishes a program for allocating funds to the states for recreational trails and trail-related projects. The program is administered by the Department of Transportation, Federal Highway Administration, in consultation with the Department of Interior. Projects must be from trail plans included or referenced in a Statewide Comprehensive Outdoor Recreation Plan required by the Land and Water Conservation Fund Act (Section 1302 (a)(b)).

Permissible uses of the funds are: administrative costs, environmental and safety education programs, maintenance and restoration of existing recreational trails; development and rehabilitation of trailside and trailhead facilities and trail linkages for recreational trails; purchase and lease of recreational trail construction and maintenance equipment; and construction of new recreational trails (with restrictions for new trails on federal lands). Environmental mitigation projects are given priority consideration.

For states to remain eligible to receive funds, (1) the Governor of the state must designate the state agency or agencies that is responsible for administering apportionment's made to the state; and (2) the state shall establish a state recreational trail advisory committee that represents both motorized and nonmotorized recreational trail users, which shall meet not less often than once per fiscal year. The state of Idaho has already fulfilled these requirements. The Idaho Department of Parks and Recreation is responsible for the administration of the Recreational Trails Program and the department has established a Recreational Trails Program Advisory Committee that includes both motorized and nonmotorized recreational trail users.

Determination of Needs

At least 30 percent of funds that Idaho receives annually must be reserved for uses relating to motorized recreation. Another 30 percent of funds received annually must be reserved for uses relating to non-motorized recreation. The remaining 40 percent gives preference to project proposals with the greatest number of compatible recreational purposes or that provide for innovative recreational trails corridor sharing by motorized and non-motorized use.

Funding

Administrative costs for FHWA are limited to 1.5 percent nationally to pay expenses of the Advisory Committee, to cover the cost to the Secretary for administration of and research and technical assistance under the recreational trails program, and for administration of the National Recreational Trails Advisory Committee (Section 1103 (1)).

Funds are allocated to states by (1) 50 percent equally among all eligible States and (2) 50 percent proportionately on non-highway recreational fuel use (Section 1103(2)). For 2003, Idaho's apportionment will be \$823,251.

States may provide funds as grants to private organizations, city governments, county governments, or other government entities.

Project Selection

After the Idaho Department of Parks and Recreation (IDPR) receives Recreational Trails Program applications and determines which applications are eligible, the Recreational Program Advisory Committee Meeting is scheduled (usually in March). This meeting is conducted by IDPR staff and is an open public meeting.

The committee rates each application on the Priority Rating Form. Staff then tallies the scores to determine the over-all score or ranking of the applications. The applications are then presented to the Idaho Park and Recreation Board in priority ranking order. Projects are funded according to the priority ranking order. The Idaho Park and Recreation Board and the Federal Highway Administration provide final project approval.

Application Process

Applications for the Recreational Trails Program are accepted once per year based on the federal fiscal year. The application deadline for the FY 2003 (Oct. 1, 2002 – Sept. 30, 2003) program is January 31, 2003. Applications are accepted throughout the year, however those received after January 31, 2003, will compete with applications for the following year. The Idaho Department of Parks and Recreation annually announces the availability of funding at least 60 days prior to the end of the application period.

The application process requires that the applicant submit one original and ten copies of the IDPR Grant Application Form 50.4 and any supporting documentation by the submittal deadline.

Description of the Program

Idaho has had officially designated scenic routes since June of 1977. In 1991 the U.S. Forest Service, the Bureau of Land Management, and the state of Idaho determined to combine the scenic routes and backcountry byways of each agency under one umbrella. The Idaho Transportation Department (ITD) was designated by the Governor as the lead agency responsible for administering the Idaho Scenic Byways Program to meet the requirements of the Intermodal Surface Transportation Efficiency Act of 1991. In March of 1995 the Scenic Byways Advisory Committee was established by an ITD Director's memorandum to coordinate scenic byways nominations, federal grant application requests, and to advise the Idaho Transportation Board on all scenic byways' activities. A year later this committee was established as a permanent body by Idaho Transportation Board Policy B-09-11.

Determination of Needs

The federal Scenic Byways Program serves two functions: (1) to promote the scenic, historic, and backcountry byways of Idaho, and (2) to provide funding for tourist amenities, kiosks, and signs that will assist the traveler on the byways. The statewide brochure *Taking the Scenic Route: A guide to Idaho's Scenic Byways* as well as individual byway brochures, audio tapes, web-pages, and other informational documents serves the former function. Project requests from local byway groups are submitted annually to serve the latter.

Needs are determined by corridor management plans developed for the byways, or community interest groups' goals in lieu of a corridor management plan. Development of a corridor management plan is encouraged before any other project is initiated on a scenic, historic, or backcountry byway.

Funding

Funding for scenic, historic, or backcountry byways is available through the Federal Highway Administration's (FHWA) Scenic Byways Program. Unlike other special programs that designate, by state, an amount of available funding, the Scenic Byways Program is labeled "discretionary," meaning that all projects nationwide compete equally for funding. In fiscal year 2002 the program's funding level was \$25.5 million. Idaho received \$2,000,000.

Scenic byway funding requires a 20-percent local match and is a "reimbursement" program; meaning funds must first be expended before reimbursement occurs.

Project Selection

The project must be on a highway or local road designated as a scenic, historic, or backcountry byway. Eligible projects include the following: developing and implementing a corridor management plan; safety improvements required as a result of byway designation; pedestrian / bicyclist facilities; rest areas, turnouts, highways shoulder improvements, passing lanes, overlooks, and interpretive facilities; enhancing access to an area for recreational purposes; protecting scenic, historic, recreational, cultural, natural, and archeological resources; developing and providing tourist information; and developing and implementing a byway marketing program.

After ITD receives project applications, the Scenic Byways Advisory Committee reviews them to determine their eligibility. This review occurs in May. The projects are then prioritized and submitted to the Idaho Transportation Board in June for approval. Following board approval they are then submitted to the Federal Highway Administration by June 30. Scenic Byway grant applications from all across the nation are reviewed by the Department of Transportation in Washington, D.C. Finally, a selection committee in Washington, D.C. decides which projects are funded. Projects approved for funding are announced after October 1.

Application Process

The application process opens each year in January. All applications are due to the appropriate ITD district office in April. Specific dates are set on a year-to-year basis. Projects for scenic byway discretionary funding are submitted via an on-line application process at www.byways.org. The on-line application process follows a user-friendly “fill-in-the-blank” method. A “click of the button” submits it to the Idaho Transportation Department. The appropriate ITD district planner must review the application by mid-April and then forward it to ITD headquarters’ staff. The Scenic Byway Advisory Committee then reviews and prioritizes the project submittals prior to submitting them to the Idaho Transportation Board and FHWA.

Certification, Development & Amendment Processes

Certification

For more information contact:
Patti Raino
Intermodal Planning Manager
Division of Transportation Planning
Phone: (208) 334-8209
FAX: (208) 334-4432
praino@itd.state.id.us

Requirements

In accordance with 23 CFR 450.220, the Idaho Transportation Department hereby certifies that its statewide transportation planning process is addressing major issues facing the state and its non-urbanized areas, and is being carried out in accordance with the following requirements:

- 49 U.S.C. Section 5323(k), 23 U.S.C. 135, and 23 CFR part 450.220;
- Title VI of the Civil Rights Act of 1964 and the Title VI Assurance executed by each state under 23 U.S.C. 324 and 29 U.S.C. 794;
- Section 1101 of the Transportation Equity Act for the 21st Century (Pub. L. 105-178) regarding the involvement of disadvantaged business enterprises in the FHWA and the FTA funded project (Sec. 105 (f), Pub. L. 97-424, 96 Stat. 2100, 49 CFR part 23);
- The provisions of the Americans with Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and the U.S. DOT implementing regulation;
- The provision of 49 CFR 20 regarding restrictions on influencing certain activities; and
- (for states with non-attainment and/or maintenance areas outside metropolitan planning area boundaries) Sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506 (c) and (d)).

Further, the Idaho Transportation Department concurs with the self-certifications of the Community Planning Association of SW Idaho, Bannock Planning Organization, and Bonneville Metropolitan Planning Organization regarding the development of Metropolitan Transportation Improvement Programs.

Other Requirements

As required by 23 CFR 450.212, the STIP was developed with **public involvement** under the process adopted by the Idaho Transportation Board on March 9, 1995.

Projects contained in the STIP are consistent with the ***Idaho Transportation Plan***, as published by the Idaho Transportation Department in May 1995.

For all **air quality** nonattainment and maintenance areas in Idaho, the STIP conforms to all applicable criteria and procedures in 40 CFR Parts 51 and 93. These criteria and procedures have been satisfied during the TIP and STIP development and review processes. The STIP complies with all applicable conformity requirements, including those relevant to specific pollutants and implementation plan status.

The Idaho Transportation Department, as the Governor's designee, approved the metropolitan transportation improvement programs (MTIPs) for the Community Planning Association of SW Idaho, Bannock Planning Organization, and Bonneville Metropolitan Planning Organization in September 2001, as well as interim TIPs for the newly developing urbanized areas of Coeur d'Alene, Lewiston and Nampa. All MTIP federal-aid projects are included in the STIP without modification as well as locally funded projects that are regionally significant.

All MTIP projects in the three years of the STIP are selected by agreement with the metropolitan planning organizations as provided for under 23 CFR 450.222. This means that projects in the second or third year could be moved to the first year without amendment. Any projects shown beyond the first three years are for information only.

October 4, 2002

STATEWIDE TRANSPORTATION PLANNING PROCESS SELF-CERTIFICATION

The Idaho Transportation Department hereby certifies that its statewide transportation planning process is addressing major issues facing the State and its non-urbanized areas, and is being carried out in accordance with the following requirements:

- I 49 U.S.C. Section 5323(k) and 23 U.S.C. 135;
- II Title VI of the Civil Rights Act of 1964 and the Title VI Assurance executed by each State under 23 U.S.C. 324 and 29 U.S.C. 794;
- III Section 1101 of the Transportation Equity Act for the 21st Century (Pub. L. 105-178) regarding the involvement of disadvantaged business enterprises in the FHWA and the FTA funded project (Sec. 105(f), Pub. L. 97-424, 96 Stat. 2100, 49 CFR, part 23);
- IV The provision of the Americans With Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and the U.S. DOT implementing regulation;
- V The provision of 49 CFR part 20 regarding restrictions on influencing certain activities; and
- VI Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506(c) and (d)).

Statewide Transportation Improvement Program

The Statewide Transportation Improvement Program (STIP) must be based on a transportation planning process. The transportation planning process establishes policy and addresses the overall direction in the allocation of resources and coordination of the different modes of transportation. It classifies the various systems according to their function and assesses the performance and condition of the different modes and makes recommendations for improvements. It reviews the relationship of transportation to land use, economic development, the environment, and energy use. The process allows for public involvement in transportation planning, for coordination with local and tribal governments and other agencies, and for transportation funding and management of the department.

System plans are developed for individual modes of transportation. Through these plans, systemwide as well as specific facility needs are assessed along with prioritizing resources.

STIP Development

The STIP is a priority list of projects/programs to be carried out during the next three years (FY 2003-2005) by the Idaho Transportation Department. Also included are projects developed by each of Idaho's three metropolitan planning organizations (MPOs) located in Boise, Idaho Falls, and Pocatello and those for the developing MPO areas of the Coeur d'Alene, Lewiston and Nampa urbanized areas.

As required by 23 and 49, *Code of Federal Regulations* (CFR), regarding the Statewide Planning; Metropolitan Planning; Rules, the state shall develop a STIP. The STIP shall include:

- A list of priority transportation projects proposed to be carried out in the first three years of the STIP. This list must be in conformance with each MPO's Metropolitan Transportation Improvement Program (MTIP);
- Cover a period of not less than three years, but at state discretion cover a longer period. Projects beyond three years are for information purposes only and are not subject to or submitted for approval by the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA);
- Contain only projects consistent with the policies stated in the department's 20-year *Idaho Transportation Plan*;
- In air quality nonattainment and maintenance areas, contain only transportation projects found to conform, or from programs that conform to air quality standards in the Clean Air Act;
- Be financially constrained by year and include sufficient financial information to demonstrate which projects are to be implemented using current revenues and which projects are to be implemented using proposed revenue sources while the system as a whole is being adequately operated and maintained;
- Contain all capital and noncapital transportation projects (including transportation enhancements, Federal Lands Highways projects, trails, pedestrian walkways, and bicycle transportation facilities), or identified phases of transportation projects;
- Contain all regionally significant transportation projects requiring an action by FHWA or FTA;
- Include for each project sufficient descriptive material; estimated total cost; amount of federal funds proposed to be obligated during each program year; for the first year, the proposed category of federal funds and source(s) of nonfederal funds; for the second and third years, the likely category or possible categories of federal funds and source(s) of nonfederal funds; and identified agencies responsible for carrying out the project; and
- For nonmetropolitan areas, include only those projects that have been selected in accordance with the project selection requirements.

Funding

Funds made available under 23 and 49 U.S.C. require the department to certify the STIP was developed in accordance with all applicable requirements of the Federal Transit Act, Title VI of the Civil Rights Act, sections related to disadvantaged business enterprises in FHWA- and FTA-funded

projects, provisions of the American with Disabilities Act, and sections of the Clean Air Act. In addition, we must certify the program was developed with public involvement and is consistent with the Metropolitan Transportation Improvement Programs.

Amendment Procedures

Requirements

- The STIP is a three-year document. Any addition or deletion of a project to the STIP requires an amendment.
- A change in project funding source across modes for projects within the existing STIP requires an amendment; e.g., the funding for a project changes from transit to highway or vice versa.
- A change in funding priority within the existing STIP among highway funded projects only or among transit-funded projects only **does not** require an amendment.
- Shifting existing projects within the STIP (first three years) will not require new public involvement since initial public involvement for the STIP covered the entire STIP time frame.

Approvals

Nonattainment areas:

- Amendments that involve projects that are air quality neutral as defined in the DOT/EPA Interim Conformity Guidance can be individually approved by the appropriate modal agency.
- Amendments that involve projects that are not air quality neutral require joint FTA/FHWA approval.

Attainment areas:

- Amendments that deal only with highway project actions or transit project actions and which are not of an intermodal nature can be individually approved by the appropriate modal agency.
- Amendments that deal with funding across modes, or that involve projects of an intermodal nature or interest (including but not limited to, HOV facilities, park-and-ride lots, or car pools) require joint FTA/FHWA approval.
-

Copies of all approved amendments must be provided to the other agency for information and to ensure that each agency is maintaining the same up-to-date STIP document.

Public Involvement

- The addition or deletion of projects from the STIP will require public involvement only in the region affected by the project.
- “Minor” projects (e.g. projects that do not affect air quality or require an environmental document) that were previously listed in the STIP but are programmed beyond the first three years will not warrant further public involvement by shifting such projects into the first three years.
- “Major” projects (e.g. projects that would require an environmental document or are regionally significant in terms of air-quality impact) that were previously listed in the STIP but are programmed beyond the first three years will require further public involvement before they can be shifted into the first three years.

The department has completed public involvement and considered public comments for the currently shown program.

Project Selection

The STIP is a three-year program with projects prioritized by year. This allows flexibility for the projects to move within the three-year time frame. The selection process may be concurrent with the project shift to the first year or may be a subsequent action. Any change in funding priority will require documentation that the state, MPO, or local agency responsible for project selection involved in the proposed changes has agreed to the proposed changes in funding priority. Projects originally in the first year must be implemented in the next year or accounted for in subsequent STIPs.
